

HYDROMETTE

BL COMPACT TF 2

The BL Compact TF 2 unit is a **precise thermo hygrometer** for measuring the temperature and air relative humidity **in many applications** (e.g. residential space, air conditioning, printing shops, warehouses, museums).

On the easy-to-read display, three different measured values may be shown, e.g. a combination of air humidity, air temperature, and dew point temperature.

MEASURING RANGES

- **AIR HUMIDITY**
0 to 100% R.H.
±3% R.H. (20 to 80% R.H.) (*)
- **TEMPERATURE**
-20 to +70 °C
±0.5 °C (-10 to +60 °C) (*)

(*) = sensor accuracy

PROPERTIES

- Automatic calculation of dew point temperature and equilibrium wood moisture content (EMC)
- Display of absolute air humidity in g/m³

- USB interface for transferring the measured values to a PC on which the DIALOG BL+ optional software is executed (for long-term measurements or process monitoring)
- Storage of the 5 most recent measured values
- 185 mm [L]
